Professional Summary

Computer Science Engineering student with strong foundations in software development, data structures, and full-stack engineering. Skilled in C, C++, Python, Java, and web technologies, with hands-on experience building AI-powered code analysis tools, interactive web applications, and database systems. Adept at applying algorithmic problem-solving to develop performant, maintainable software solutions.

Technical Skills

Languages: C, C++, Java, Python, C#, JavaScript, HTML, CSS

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), REST APIs

Frameworks & Web: React, Node.js, Three.js, WebGL

Databases & Tools: MySQL, Supabase, Git, Linux, Abstract Syntax Trees (AST)

Game Development & Graphics: Unity, Unreal Engine, Blender

Education

Bachelor of Engineering in Computer Science 2024 – 2028
St. Joseph Engineering College CGPA: 8.4 / 10.0

Class 12th (Pre-University) 2023 – 2024
St. Aloysius PU College Percentage: 76.8%

Certifications

- **TechA Linux Programming Foundation Certification** – Infosys Springboard 2025
- **Claude Code in Action** – Anthropic 2026
- **Claude 101** – Anthropic 2026

Projects

Explainit | *Python, Gemini API, Static Analysis, AI*

- Engineered an automated static analyzer using AST metadata parsing and AI models to explain code and flag risks without altering source code.

Flowmake | *Python, Abstract Syntax Trees, Full-Stack*

- Developed a full-stack tool that parses Python Abstract Syntax Trees to dynamically generate and render structured flowchart diagrams.

BaseTree | *React, JavaScript, Data Structures, Web Visualization*

- Built an interactive web visualization tool converting complex repository file trees into navigable, real-time node tree structures.

Customer and Inventory Lookup | *C, Hash Tables, Linked Lists, Queues*

- Implemented a high-performance system in C utilizing custom hash tables, linked lists, and queues to achieve constant-time O(1) stock lookup.

Campus Placement Database | *MySQL, HTML/CSS, Relational Databases*

- Designed a relational MySQL database system to track student drive registrations, interview processes, and recruitment metrics.

Achievements

- Won 1st place in class and department 3rd place for the **Campus Placement Database**
- Won 3rd place class for **Customer and Inventory Lookup**
